Objective

To contribute to a challenging position in software development as a Full Stack Developer, applying my skills in both front-end and back-end technologies. I aim to contribute to innovative projects, grow professionally, and advance within the industry.

Personal Profile

- VP of Digital & Development at Eliana Diamonds | Full Stack Developer with Cybersecurity Expertise and a Passion for Game Development and Innovative Solutions.
- I bring a versatile skill set in software development, including proficiency in HTML, CSS, SQL Server, MongoDB, and Full Stack development with database integration.
- I've developed an advanced inventory management system that includes product barcode scanning, automatic stock updates, real-time inventory status checks, and data storage in a robust database.
- Beyond software, I have hands-on experience in game development with Unity, creating custom 3D models and animations using Blender, and producing original soundtracks for games with FL Studio.
- My cybersecurity expertise includes tools like Kali Linux, Ubuntu, and Wireshark, showcasing my ability to secure and optimize complex technological environments.
- Whether leading projects in web development, cybersecurity, or immersive game creation, I combine creativity, technical expertise, and a problem-solving mindset to deliver innovative and impactful solutions.
- If you're looking for a professional who bridges technology, creativity, and efficiency, let's connect!

Education

2020-2023: Software Engineering Technician (Cybersecurity specialization), focusing on Java , Python and Full Stack Development
