- **Frontend:** React.js, Handlebars, CSS, Bootstrap
- **Automation & Scripting:** PyAutoGUI, Tkinter, Win32 API
- **File & Process:** Python (OS Module, PyInstaller)
- **Game Dev:** Unity, Mobile UI Design, 2D Graphics, 3D Modeling – Blender
- **Cybersecurity:** Kali Linux, Wireshark, Aircrack-ng, Burp Suite

## Professional Experience

### VP of Digital & Development, Eliana Diamonds (2023–Present)

- Managing and developing digital systems tailored to company needs.
- Optimizing existing systems (reduced load times by 60% according to Google PSI).
- Developing and managing E-Commerce sites, enhancing UX/UI and CRO.
- Integrating various development technologies (CRM) and implementing them within the system.
- Managing international procurement and supplier projects, from requirement specification and negotiation to quality control and delivery.

### Freelance Software Developer (2021–Present)

- Developing and implementing customized websites using WordPress and Full Stack frameworks, focusing on performance optimization, leveraging cloud storage, and integrating version control with GitHub.
- Building RESTful APIs to integrate with external systems, facilitating automation and optimizing business processes.
- Creating complex API-driven business systems that include database management, barcode scanning, and real-time tracking, while integrating updated data on currencies and raw materials.
- Enhancing existing systems, reducing load and response times to improve user experience (UX).

## National Service

### Security Clearance Examiner (2017–2019) | Israel Fire & Rescue Services

- Screened candidates for service in a governmental security body.

## Languages

**Hebrew:** Native | **English:** High Proficiency
