## Objective

To integrate into a challenging position in software development as a Front End / Back End / Full Stack Developer, contributing both to the organization and to myself, growing and applying my skills in web development.

## Personal Profile

- Deep knowledge of Java, JavaScript, HTML, C#, Python, and CSS, with the ability to work in both Front End and Back End environments.
- Experienced with popular frameworks like React and Node.js.
- Familiarity with databases: MongoDB, Microsoft SQL Server.
- Self-taught Unity developer with game development experience, including graphics, sound, and game logic using C#. Developed an online system with player data storage in a database.
- Self-taught Blender user, capable of 3D modeling characters, including animation creation for integration into games I developed.
- Basic self-taught experience in FL Studio for creating game sounds.
- Experience with Kali and Ubuntu in a virtual environment.
- Able to work independently, enjoy bringing new ideas, and contributing creatively to projects.

- Curious, with a passion for problem-solving and tackling challenges until finding a solution.
- Professional and consistent, always keeping up with the latest technologies and constantly striving for self-improvement.

## **Education**

2020-2023: Software Engineering, specializing in Cybersecurity (focus on Java Full Stack Development)

## **Courses and Training**

- Software Testing in an Internet Environment, The College of Management, 2019
- Mobile Technician, 2017
- IL WebSec Digital Course – Identifying Vulnerabilities and Building Defenses, 2022

## **Work Experience**

Currently a freelancer in building and maintaining websites using WordPress, Node.js, Express, and React.

## **National Service**

2017-2019: Confidential security role in Fire and Rescue Services

## **Languages**

Fluent in Hebrew and English, excellent verbal and written communication skills.
