Summary

Software Developer with a background in building tools that work. Built **AI-driven platforms** and **automated workflows** from scratch using **React**, **Node.js**, and **Python**. Focused on writing **clean code** based on **OOP** principles to make sure tools are easy to maintain and scale. Skilled at **clean debugging** to fix complex issues and keeping data safe while making things easy for the end user.

Skills

- **Languages & Logic:** Python, JavaScript (ES6+), **TypeScript**, Java, SQL, C#, and **OOP**.
- **Frontend & UI: React.js**, HTML5, CSS3, **Tailwind CSS**, and Responsive Design.
- **Backend & AI: Node.js**, Express, **FastAPI**, **LLM Integration** (OpenAI/Claude), **RAG Pipelines**, and **Vector Databases**.
- **Tools & Cloud: AWS**, **Git**, **Prisma ORM**, REST APIs, JWT, and Webhooks.

Experience

Software Developer | Eliana Diamonds | 2023 - 2025

- **Built** and **maintained** internal tools and e-commerce websites using **React** and **Node.js**.
- **Improved** page load speeds by 60% by **refactoring frontend code** and **optimizing database queries**.
- **Wrote Python automation scripts** to handle repetitive daily tasks and **integrated REST APIs** for payments and shipping.
- **Managed** secure **RBAC** (Role-Based Access Control) to keep company data protected.
- **Performed** extensive **clean debugging** and deep-level troubleshooting. Traced difficult errors across the full stack, fixed memory leaks in the backend, and resolved sync issues between the database and the UI to ensure 100% uptime for internal tools.

Education

Practical Software Engineering | College of Management | Graduated 2024

- **GPA: 85.**
- Focused on **Data Structures**, **Algorithms**, and **Object Oriented Programming (OOP)**.

Projects

- **CallIntel (AI Call Analytics):** Built a full platform that used **Whisper** to transcribe audio, ran **LLM** analysis for speaker sentiment, and used **Vector Databases** (**Pinecone**) to allow for smart searching and automated scoring.
- **MeetingCalendar (SaaS Booking):** Developed a complete appointment system that used **TypeScript** and **Prisma** to manage medical clinic schedules, handled secure **JWT logins**, and automated client emails with **Nodemailer**.
